

Developer API Licensing and Usage Agreement

Section 1.0: API Access Grant and Developer Credentials

Company grants Developer a non-exclusive, revocable license to access the Developer API strictly for integrating approved third-party applications. API secret keys must be stored securely in server-side environments and never exposed in public repositories or client-side web bundles.

Section 2.0: Rate Limiting and Quota Enforcement

API requests are rate-limited per API key based on subscription tier: Standard Tier keys are limited to 100 requests per minute; Enterprise Tier keys are entitled to 1,000 requests per minute with a burst allowance of up to 1,500 requests per minute. Exceeding limits will return HTTP 429 Too Many Requests.

Section 3.0: Intellectual Property and Data Ownership

Developer retains all proprietary rights and ownership over application data submitted through the API. The Company retains all intellectual property rights, patents, copyrights, and trade secrets in the API platform and underlying model endpoints.

Section 4.0: Prohibited Reverse Engineering and Scraping

Developers are strictly prohibited from decompiling, reverse engineering, scraping bulk dataset payloads, or using API outputs to train competing machine learning or artificial intelligence models.
